HOME/SCHOOL COMMUNICATION 2.0

District 102 is committed to providing exemplary communication within and beyond our learning community. Through traditional and modern communication tools, our District will continue to provide and solicit timely and relevant information wherever and whenever possible. While not completely "paperless" in our communication effort, District 102 will use the website (<http://www.d102.org>) to communicate information that is suitable for public access. More personal and protected information will be shared through more direct and private channels.

Three levels of electronic communication use a variety of tools to reach and inform our community:

Level One:
(email only)

General, non-emergency information or late-breaking news will be communicated on the website, through email, and with strategic use of paper letters and/or forms where necessary. All community members who have provided a current email address will receive electronic versions of the 102uesday Weekly News. Households with students enrolled in District 102 will also receive the Superintendent's monthly email communication.

Level Two:
(home phone/
email)

Important and timely information related to changes in events/activities or of general concern will be communicated through email and a call to the home. This information will also be listed on the District website.

Level Three:
(all devices)

School Closing and Emergency Information will be sent immediately to all parents and/or guardians registered with District 102 through mobile phone(s), home phone, email and text message and will be posted on the District website. **School Closing** information is also recorded on school voicemail systems and broadcast on radio and news stations.

Please be sure to update your contact information at your child's school if any information has changed.
